- 43" pallets – 1,200-pound capacity
- 53" pallets – 1,500-pound capacity
- Weighs 30 or 37 pounds

Non-Skid Button

Space saving

Empty pallets lock together when stacked for easy storage, minimizing space required inside the delivery trailer and warehouse.

Durable

Pallets are made of tough, impact-resistant polypropylene, providing years of re-use – and they are recyclable.

Self-aligning

Pallets self-align smoothly and lock into place when the deck is raised for safe, secure product transport. Non-skid button inserts offer additional load stability.

Functional design

Stretch wrap hook makes order containment fast and efficient. Ergonomic handle locations provide ease of use and comfort.

Quick and easy displays

Simply drop the pre-built pallet, remove the stretch wrap and attach base wrap and signage.
