

Magliner Coolift® System Benefits

Improve account efficiency up to 50%

- Higher capacity loads mean fewer trips from truck to store
- Orders pre-picked and loaded in route sequence eliminate driver pick time
- Compatible with automated pick systems
- Drop and wrap Coolift pallets for no-touch merchandising displays

Potential driver turnover reduction of 30% or more

- Eliminating driver picking lowers workers' compensation claims up to 32%
- Pre-picked orders eliminate reaching into bays and reduce product damage
- More cases per roll and fewer product touches reduce driver fatigue
- Warehouse order-picking reduces driver exposure to inclement weather

Lower fleet operating expenses up to 25%

- Delivering more products on fewer trucks reduces fleet up to 25%
- Combining C-Store and grocery deliveries increases fleet flexibility and reduces assets
- Changing from side-load to end-load trucks reduces maintenance costs
- Fewer trucks on the road cuts fuel costs

Increase customer satisfaction

- Order staging creates faster, easier check-in process and less store congestion
- Eliminating two-wheel hand truck use minimizes floor damage
- Pre-building orders improves order accuracy
- Increasing driver retention provides greater, long-term customer relationships
