

Magliner Coolift®

GENERAL SPECIFICATIONS

- 18.5" wide x 58" long x 62" tall
- 190 pounds
- Up to 1,500-pound capacity

Hydraulic lifting system

Allows steady, stable raising and lowering of products without manual lifting. Pump back-up system is provided in case of power outage.

6-wheel design

Center tilt design allows drivers to move loads easily over thresholds and bumps. Rear swivel casters provide 360-degree maneuverability in store aisles and 85% of coolers. Durable gray thermoplastic rubber casters and urethane wheels are non-marking, easy on floors and reduce damage in stores.

Extruded aluminum frame

Strong but lightweight, the unit has a clean, rust-free appearance that brings a quality, professional look to your operations. Ergonomic handles offer exceptional control and comfort.

Battery

24-volt battery system may be charged from a standard wall unit or onboard a properly equipped delivery vehicle. Battery cannot be overcharged. Fully-charged battery will last through a typical delivery day.

Hydraulic dual wheel disc brake system

Provides both speed and holding control. Allows drivers to slow, stop or retain up to a 1,500-pound load safely and easily.
